NOTES:
 SRL (State Reporting Level): indicates the minimum reporting level required by the Washington Department of Health (DOH).
 MCL (Maximum Contaminant Level) maximum permissible level of a contaminant in water established by EPA; Federal Action Levels are 0.015 mg/L for Lead and 1.3 mg/L for Copper. Sodium has a recommended limit of 20 mg/L. A blank MCL value indicates a level is not currently established.
 Trigger Level: DOH Drinking Water Response level. Systems with compounds detected in excess of this level are required to take additional samples. Contact your regional DOH office.
 ND (Not Detected): indicates that the parameter was not detected above the Specified Reporting Limit (SRL).
 An * in front of the parameter name indicates it is not NELAP accredited but it is accredited through WSDOH or USEPA Region 10.
 These test results meet all the requirements of NELAC, unless otherwise stated in writing, and relate only to these samples.
